Professional Summary

Cybersecurity and networking professional with a **Master's degree in Internetworking** and over 7 years of experience in technical support, operations, quality assurance, and team leadership. Skilled in **security monitoring**, access management, risk assessment, and network infrastructure. Experienced with **SIEM tools**, threat analysis, and compliance-driven environments. Adept at analyzing security events, maintaining documentation, and collaborating with cross-functional teams to support secure IT operations.

Core Skills

- Information Security Principles
- **Risk Assessment & IT Risk Governance**
- Access Management & Identity Controls
- Security Monitoring & Incident Response
- **SIEM Tools (Splunk), IDS/IPS (Snort)**
- Network Security & Traffic Analysis
- Vulnerability Assessment
- **Ticketing Systems & Incident Documentation**
- Microsoft Office Suite (Word, Excel)

Technical Skills

Security & Networking Tools: Wireshark, Splunk, Snort, **OWASP ZAP**, Cisco Packet Tracer
Automation & Scripting: Python, PowerShell, Ansible
Protocols & Data Formats: JSON, YAML, XML, RESTCONF, NETCONF, YANG
Operating Systems & Virtualization: Linux, **VMware**
Programming: Python, C, C++, Java, **SQL**
Security Frameworks: MITRE ATT&CK, Cyber Kill Chain

Professional Experience

Financial Services Representative

Canadian Imperial Bank of Commerce (CIBC), Halifax, NS ***Oct 2025 – Present***

- Delivered secure banking solutions to **50+ clients daily**, ensuring **100% compliance** with regulatory and internal policies.
- Analyzed client needs and recommended financial products, contributing to **increased product adoption and customer retention**.
- Resolved **40–60 daily customer inquiries and transactions** in a fast-paced environment while maintaining high accuracy.
- Educated **100+ clients/month** on digital banking tools, improving adoption of secure online financial services..

Teaching Assistant – Network Architecture & Data Networking

Dalhousie University, Halifax, NS ***Jan 2024 – Mar 2024 | Jan 2025 – Mar 2025***

- Assisted **50+ students** per semester in implementing networking technologies including **OSPF, BGP, MPLS**, multicast, and **SDN.**
- Conducted and supported 20+ lab sessions, reducing troubleshooting time and improving student **performance by ~30%.**
- Resolved **100+ student queries** related to network configuration, architecture, and security concepts.

- Delivered hands-on instruction on **data center and hybrid cloud architectures**, including virtualization (VMware), storage systems (NAS/NetApp), and enterprise networking, aligned with production-grade infrastructure environments.
- Troubleshot **20–30 hybrid virtualized incidents/month** across on-prem VMware and cloud-based compute environments, ensuring **99.9% service availability** through failover configurations and backup/DR validation using **Veeam, VMware snapshot backups tools.**

Trainer / Team Lead / Assistant Manager

Movate Technologies ***Jul 2019 – Aug 2023***

- Trained and mentored **30–40 team members**, improving operational efficiency and **reducing errors by ~25%.**
- Handled **50+ daily** operational and security-related incidents, performing event triage, severity assessment, escalation management, and **SLA tracking within SOC-aligned workflows.**
- Developed SOPs and knowledge bases, **reducing onboarding time by ~20%** and improving process consistency.
- Led teams to maintain **95%+ compliance** with **ITIL processes**, SOPs, and documentation standards, ensuring adherence to audit requirements and operational SLAs.
- Integrated **MITRE ATT&CK-**based threat scenarios into training, enhancing security awareness across teams.
- Collaborated with cross-functional teams, contributing to faster issue resolution and proactive risk mitigation.

Quality Analyst

Teleperformance ***Aug 2017 – Jul 2019***

- Conducted **20–30 quality audits daily**, ensuring data integrity and application reliability.
- Developed and executed comprehensive test strategies **(functional, regression, and UAT**), achieving **~20% reduction** in defects through defect lifecycle management and root-cause analysis.**.**
- Identified recurring issues and contributed to **15–25% reduction in escalations** through process improvements.
- Supported **malware analysis and application security validation**, including behavioral analysis and **threat identification**, strengthening overall security testing coverage.
- Evaluated end-to-end system workflows and application performance, ensuring high availability **(uptime >99%)** and compliance with **operational SLAs** and quality standards.

Technical Analyst

Accenture Solutions Pvt. Ltd., India ***May 2016 – Jul 2017***

- Resolved **30–50 infrastructure incidents per week** using ITSM tools, improving **MTTR (Mean Time to Resolution) by ~25%** through effective troubleshooting and incident management.Supported enterprise systems (Active Directory, DNS, DHCP) across **100+ users and systems**.
- Administered and supported **enterprise directory and network services (Active Directory, DNS, DHCP)** across **100+ users/endpoints**, ensuring high availability and service reliability.
- Developed **Python-based automation scripts** for ticket triage and categorization, reducing manual workload by **~20%** and improving operational efficiency..
- Managed and monitored **data center infrastructure components (UPS, PDU, racks, cooling systems)**, maintaining **~99.9% uptime** and ensuring adherence to availability SLAs.
- Used **data-center monitoring tools (DCIM / infrastructure monitoring dashboards)** to track power,

temperature, and uptime

- Supported **database and middleare platforms (SQL/NoSQL systems)** for multiple business-critical applications, ensuring performance, reliability, and service continuity

Education

Master of Engineering – Internetworking
Dalhousie University, Halifax, Canada Sep 2023
– May 2025
Bachelor of Engineering – Computer Science
Jawaharlal Nehru Technological University Hyderabad, India.
